4	some math	3
5	Conclusions	3

1 Introduction

Make it possible for all to write documents with L^AT_EX!

1.1 more introduction

Go more in detail . . .

1.1.1 even more introduction

come to the point . . .

Paragraphs A paragraph is small but

Subparagraphs subparagraphs are smaller!

Outline First we start with a little example of the article class, which is an important documentclass. But there would be other documentclasses like book, report and letter which are described in Section. Finally, Section gives the conclusions.

2 Documentclasses

- article
- book

- report
 - letter
1. article
 2. book
 3. report
 4. letter

article Article is ...

book The book class ...

report Report gives you ...

letter If you want to write a letter.

3 tabular

No paper without a tabular!

first column	second column	third column	fourth column
l stand for left	c for center	r for right	and p for predefined size

4 some math

Math in text is called in line math just put \$ character around the math think. Like $a^2 + b^2 = c^2$. It looks better if you use this

$$a^2 + b^2 = c^2$$

5 Conclusions

There is no longer L^AT_EX example which was written by [Doe].
